

清溝吸泥車 VAC JET TRUCK

 <p>高壓水管捲盤 後置捲盤 · 旋轉旋轉，左右位移 · 自動或手動旋轉捲盤 · 不銹鋼編織或強化纖維膠帶高壓水管 · 直徑 3/4" ~ 1-1/4"，長度可達200公尺</p> <p>Main hose reels · rear fixed · pivoting and cross travel · automatic or manual swivel · automatic or manual hose guide · steel braided or textile reinforced rubber hose · dia. 3/4" ~ 1 1/4" up to 200 m length</p>	 <p>輔助水管捲盤 · 設置於左側或右側 · 旋轉旋轉達120度 · 自動或手動旋轉捲盤及排水水管 · 不銹鋼編織或強化纖維膠帶高壓水管 · 直徑 3/8" ~ 1-3/4"，長度可達80公尺</p> <p>Auxiliary hose reel · fixed 1/1/1h · pivoting up to 120° · automatic or manual rotation and hose guide · steel braided or textile reinforced rubber hose · dia. 3/8" ~ 1 3/4" up to 80 m length</p>	 <p>吸管連接器 · 標準球型連接器 (Perrot - Bauer)</p> <p>Connection Storz - standard ball type - Perrot - Bauer - diw reduction fitting</p>	 <p>真空吸吸管路備有自動消毒除臭裝置</p> <p>Automatic deodorizing and sanitizing system for vacuum line emission</p>	 <p>洗手台： 備有摺疊式水盆及冷熱水開關</p> <p>Handwash unit with fold down basin and taps for hot and cold water</p>
 <p>迴旋式油壓絞盤：供吊吊水溝蓋</p> <p>Hydraulic winch for catch basin lids, with swivelling arm</p>	 <p>氣動延伸式車後防撞桿</p> <p>Mobile rear bumper with pneumatic extension</p>	 <p>第二道氣旋式過濾備有洩出口並自動回收至主槽設備</p> <p>Automatic device for draining the secondary cyclone shutoff back to the main tank</p>	 <p>前置式洗街器，由駕駛室內操控</p> <p>Street washing front bar complete with inside cab controls</p>	 <p>污泥桶或清水桶備有下列選擇之水位計： · 玻璃管式 · 剝皮機械式 · 球型水位計</p> <p>Sight glasses for waste or clean water tanks · tubular · mechanical index plus floating ball · round, flat or ball type</p>
 <p>監視系統： 含有車尾監視攝影機及駕駛室內螢幕</p> <p>Video system diw rear camera and inside cab monitor</p>	 <p>車頂平臺式真空吸管捲盤 (可加裝吸管導臂)</p> <p>Horizontal top suction hose reel, with or without mobile guiding arm</p>	 <p>各式高壓噴頭，沖溝使用</p> <p>Various kind of high pressure nozzles for flushing the sewer pipe</p>		

SECO

循環再生系統：可供高壓沖水(經過過濾後)，再度循環使用。

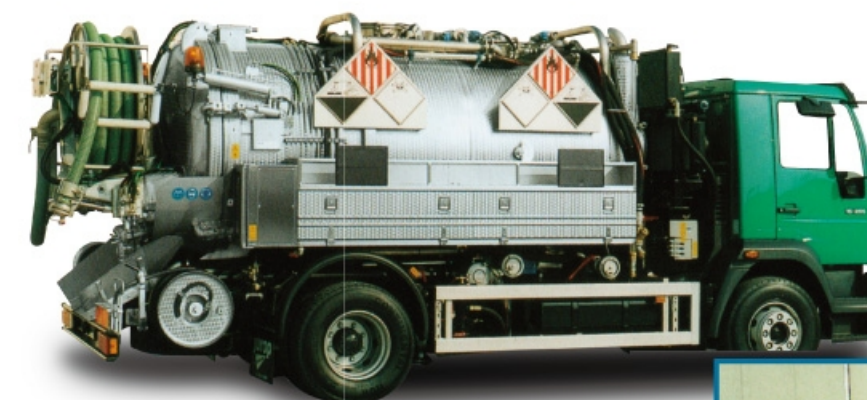

本系列可加裝於任何沖吸二用清溝車，具有下列優點：

- * 無需重複加水，並可於水源不充足處清理暗溝。
- * 高效率的循環作業，並備有循環系統自潔功能。
- * 於都會區作業時，不會因頻頻的運送卸泥及加水而影響交通。
- * 由循環再生系統切換成一般標準清溝系統，緊需數分鐘即可完成。

The recycling system allows to recollect and use, after proper filtering, the water of the high pressure cleaning operation.

This system can be mounted on all standard combined units with the following features:

- * No need of clean water refilling and possibility of operating also on sewerlines with limited proper water.
- * High efficiency and continuous duty, with automatic self cleaning recycling system after each job.
- * No traffic jams due to frequent unloading of waste and refilling of water while operating in the city.
- * Switch-over from "specialized" recycling unit to "standard combined" unit in only a few minutes with a completely automatic operation.

沖吸二用清溝車可供吸泥及運送污物，並具有高壓水沖溝設備。

整車架裝於卡車底盤或拖板車上。

幫浦由分向式PTO驅動，動力源為輔助引擎或底盤PTO。

所有組件皆依客戶操作使用之需求進行配備。

Combined unit for suction and transport of liquid waste complete with high pressure.

Mounted on a truck chassis or on trailer or roll on-roll off units. The pump can be powered by a split shaft PTO, by auxiliary engine or direct motor PTO.

All components are selected according to the enduser's operating needs.

Various combination of water compartments can be supplied with different capacity.

滿足客戶之需求：

事先提供完整之規劃及配備，配合我們任何時間/地點可靠的售後及諮詢服務。

Satisfying the customer by supplying in advance the characteristics of the complete equipment through to a reliable after sales service and consulting assistance at any time or place.

各式完成車範例 Complete build up vehicles
